

# SPIES Lid with cutlery

Fork, spoon and other variants

## WHY?

Our patented innovation - environmentally friendly snacking, always and everywhere. The lid with integrated cutlery is our answer to the legal ban on disposable cutlery.

## INNOVATIVE!

As a mono-material product, our lid can be equipped with all technically feasible cutlery and converted from a closure to a "snack helper" in no time at all. The special thing about it: the cutlery is part of the lid surface, which prevents the use of additional amounts of plastic and allows us to equip 1 product with 2 functions despite the minimal use of resources. Thanks to the mono-material, it is fully recyclable in the process. A sensible everyday helper for enjoyable consumption and a cleaner environment.

## SIMPLE HANDLING, DUAL FUNCTIONALITY

In addition to the usual quality of our injection molded packaging, you profit from further advantages:

cutlery item and size  
freely selectable

completely recyclable  
thanks to mono-material

perfect design options thanks  
to IML technology

enables easy consumption  
of to-go-products

resource saving thanks to  
2 in 1 - function

everyday helpers instead  
of disposable items

## BRANCH

food, culinary, dairy, ice

## DESIGN

Your desired article geometry can be developed individually.

## STRATEGY / CAUSE

- ✓ Replacement product for disposable cutlery
- ✓ Recyclable
- ✓ Avoidance of small individual parts
