

SPIES FC

FilmChassis

WHY?

The SPIES FC is the completely recyclable monomaterial-alternative to our SPIES PC and impresses with a combination of an injection-molded skeleton and its minimal wallthickness, thanks to the use of thick film.

INNOVATIVE!

To protect valuable resources, the SPIES FC combines the advantages of two technologies in a new kind of packaging: injection molding combined with film extrusion. Thanks to the mono-material, the bucket is ideal for the circular economy.

MINIMUM INPUT - MAXIMUM FUNCTIONALITY

In addition to the our well known and proven quality of our injection molded packaging, you benefit from other advantages:

weight reduction

optional usage of recycled material

perfect design options also with transparency

reduction of material use

verified leak proofness due to plastic seams

completely recyclable thanks to monomaterial

BRANCH

Universally usable, food, delicatessen, dairy, specialty chemicals, technology

DESIGN

Your desired article geometry can be developed individually.

STRATEGY / CAUSE

- ✓ maximum weight reduction
- ✓ conservation of resources
- ✓ optimal recyclability
