

SPIES MM

MonoMaterial

WHY?

Our world is becoming more and more sustainable and environmentally conscious. Especially in the food industry, consumers have become more sensitive. Retailers are forced to change to innovative, more environment friendly packaging solutions as a result of increased pressure from consumers and legislation.

INNOVATIVE!

Although you are already in the pole position, we have developed an innovative process to be able to decorate curved products as well. The state-of-the-art in-mold labeling (IML) process allows us to produce curved shapes as 1-material packaging and consequently 100% recyclable.

MAKE GOOD BETTER

In addition to the usual quality of our injection molded packaging, you benefit from other advantages:

Sleeve-less

Eco-friendly and sustainable

1-material packaging

Individual shapes and sizes possible

100 % recyclable

Ideal for circular economy

BRANCH

Food: spreadable fats, snacks, dairy, ice cream, coffee, to-go drinks

DESIGN

Your desired article geometry can be developed individually.

STRATEGY / CAUSE

- ✓ Curved contour now also possible as single-material packaging
- ✓ Replace sleeve packaging
- ✓ Recyclability due to 100% mono-material
