

SPIES PC

PaperChassis

WHY?

Following the market trend, the new SPIES PC meets all requirements - from weight optimization and resource conservation to the use of renewable raw materials.

INNOVATIVE!

To save plastic, the new SPIES PC consists only of a narrow plastic skeleton, which is connected to a chassis made of PP-coated cardboard.

53% LESS PLASTIC

In addition to the usual quality of our injection molded packaging, you benefit from other advantages:

weight reduction

optional usage of recycled material

perfect design options

reduction of the plastics component

verified leak proofness due to plastic seams

over 50% renewable raw material share

BRANCH

Universally usable, food, delicatessen, dairy, specialty chemicals, technology

DESIGN

Your desired article geometry can be developed individually.

STRATEGY / CAUSE

- ✓ Increasing the proportion of renewable raw materials
